CanadianCIO

OCTOBER 2017

CIO Summit 2017

A companion issue to our CIO Summit events in Montreal and Vancouver, this issue contains articles and videos on the topics of artificial intelligence, cyber security, workplace management, and digital transformation.

NOVEMBER 2017

CIO of the YearAwards

A deep dive on the stories of our two CIOs of the year (private sector and non-profit sector), plus a few of the finalists. A Q&A article series, podcast mini-series, and two videos will explore how these CIOs approach their roles, what technology transformation they undertook, how they executed on it, and what results they achieved.

DECEMBER 2017

Technicity

This companion issue to our Technicity event will focus on the artificial intelligence startups in Toronto and how the city itself could harness AI to improve public services. To feature video interviews with senior members of the city's leadership team.

MARCH 2018

25 years of Canadian CIO

A special issue reflects back on 25 years of covering the CIO role in Canada, bringing back many voices from the past including CIOs that adorned our magazine covers and past editors, culminating in a unique look at how the role has evolved and what being a CIO in 2020 will mean.

MAY 2018

Government 3.0

What does smart government guided by technology look like in Canada today? An exploration of artificial intelligence, blockchain, Internet of Things, and cloud computing and other fourth wave technologies applied to the public sphere.

JUNE 2018

Digital Transformation Awards

A companion publication to our second annual Digital Transformation Awards, this issue will tell the stories of the winners and finalists that disrupted their company culture from within, using technology to drive an entirely new way of doing business and communicating with customers.

SEPTEMBER 2018

Canadian CIO Summit recap

Dedicated to recapping the events of ITWC's own Canadian CIO Summit event, hosted annually, this issue will bring together in-depth reporting on the IT challenges top of mind for CIOs, and feature the sort of conversations that can only happen when the top technical business minds across the country spend several days together in a resort setting.

OCTOBER 2017

CDN's Channel Elite Awards

Our annual recognition of the great work Canada's solution providers are doing every day, solving the real-world problems of their clients though the innovative application of deep expertise and cutting-edge technology. Also in this special issue will be a profile of the channel partners who are disrupting the current business climate.

DECEMBER / JANUARY 2018

The Top 25 Newsmakers Issue

CDN Profiles the executives who made the news headlines for 2017 in this annual overview

FEBRUARY 2018

Top cloud providers in Canada

We'll cut through the vendor hype to discover just what cloud computing really is, look at just how ready customers are to adopt the model, and look at where the opportunities are for partner to build a profitable cloud practice with IaaS, PaaS and Storage on the cloud. Coverage of this will be determined by the 2017 CDN Top 100 Benchmark Report as well as updated results from IDC Canada.

APRIL 2018

AI in Deal Registration

Artificial intelligence or AI is not slowing down. According to Gartner, by 2020 more than 85 per cent of customer interactions will be managed without a human. What will this mean to channel partner/vendor relationships going forward?

MAY 2018

CDN's Top 100

Our annual look at the Top 100 Solution Providers in Canada, including the top five, the fastest riser and the top newcomer. Find out who the new leaders are, and where you rank compared to your peers.

SEPTEMBER 2018

Women in the IT channel

CDN's annual report profiling some of the top women leaders in Canada's IT channel along with Mentor of the Year and Rising Star. The edition will also examine the issues around STEM, breaking the glass ceiling in the channel and others.

ITWC The Content Experts

MUNICIPAL INTERFACE

MARCH 2018

Smart Cities

An issue dedicated to the methods, tools, and strategies that municipalities use when designing and/or building their IT solutions and products, and the gains they have achieved with them.

JUNE 2018

Mobility

Just about every citizen now has a smartphone in their hand, so why not every employee that works for a municipality? This issue looks at deployment and management of devices, ways mobile technology is being utilized, and what products and solutions are being used for best of breed solutions.

SEPTEMBER 2018

Going open source

It used to be an accepted norm that municipalities designed their systems behind closed doors and controlled and restricted access to only those that required it. But as the digital age flourishes and more citizenry can make use of public data, there's a movement to adopt an open source approach at many municipalities across Canada. This issue explores stories from those that are doing so and the benefits and challenges of being open.

DECEMBER 2018:

Collaborating with the private sector

Guides and case studies highlighting the many private partners ready and willing to help municipalities across Canada achieve their digitally-powered goals.

ComputerDealerNews.com
